### ***Abstract***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

**The abstract should be** in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### ***Specification***

The disclosure is objected to because of the following informalities: in ¶0012, Fig. 7 should be described as "Prior Art" to support its discussion in ¶¶0005 and 0006. Appropriate correction is required.

### ***Drawings***

Figure 7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated (as noted in ¶¶0005-0006). See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 1 – 3 are objected to because of the following informalities: it is suggested to delete the texts "(1-1)" "(2-1)" "(2-2)" "(3)" and "(4)" in the claims; also, after the word "expression" (lines 11, 16, and 21, respectively), it is suggested to insert a colon punctuation (- :- -). Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Claims 1 – 3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The punctuations following the expressions at lines 12, 17, and 22 suggest

Art Unit: 3661

incompletion. Because these expressions are not standard in the art, absent those missing terms, undue experimentation is required and the skilled artisan would not know as to how to use and/or make the invention.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. As per attached PTO-892.
